Catalyst
growing in electrical engineering, mechanical engineering and (bio)chemistry
TWICE offers with its hubs a particularly stimulating environment for young, innovative technology companies. Catalyst is one of the hubs, situated on the TU/e Campus.

‘Where innovation starts’ is the credo at this innovation hotspot. TWICE offers next generation high tech companies space to grow faster: ‘building high tech success’.

“The combination of professionalism and startup vibes at Catalyst is top notch. The startup and growth of our company was made possible by the fantastic TWICE team.”

Eline Sybesma PhD
Scientist
Ambagon Therapeutics

The campus of Eindhoven University of Technology (TU/e) is a breeding ground for innovative ideas and the beginning of great collaborations. These require a stimulating environment with a nice workspace as a basis. That’s where it all starts. Hub Catalyst meets that need and offers more. In the Catalyst hub on the TU/e Campus you can meet like-minded people. People working in the same field or in the same industry. In hub Catalyst you will find small-scale office and laboratory space for high-tech companies active in mechanical engineering, electrical engineering, physics and (bio)chemistry. All laboratories are well equipped. In addition, TWICE offers high-quality services.

In Catalyst you work from the heart of technology development, with thousands of scientists within walking distance. All facilities are available on the TU/e Campus: such as research facilities, conference center, childcare, sports facilities and more.
Benefits of Catalyst in a row:

- Theme: R&D and product development, electrical engineering, physics and (bio)chemistry
- Located on the TU/e Campus
- Close to the center of Eindhoven, highways and within walking distance of public transportation (train station)
- Office and laboratory space from 25 to 500 m² (modular and scalable)
- High quality laboratories possibly including lab equipment
- Emergency power grid and redundant fiber optic connections
- Server rooms with server boxes
- Advanced ventilation system - balanced ventilation
- Central reception with telephone answering facilities
- Own parking garage
- Various facilities within walking distance (center, childcare, sports center, etc).
- Sports in Student Sports Center at very favorable conditions
- Various general facilities such as repro, mail service
- Network of specialists, who can support in growth
Building high tech success

Many high tech companies have already used our hubs. The success and growth and performance of these high tech companies show that TWICE offers an ideal place to accelerate development. Startups and scaleups can grow in an environment with high quality facilities, great flexibility, first class service and a nice community of top companies.

Our shareholders are the Brabant Development Agency (BOM), Eindhoven municipality, Eindhoven University of Technology, Brainport Development and Rabobank. Together with us, they ensure that companies in the Brainport region can flourish.
